

## Lamoureux & Dickinson joins forces with TCE

*May 16, 2022*

Lamoureux & Dickinson Consulting Engineers and TCE, Inc. d/b/a Trudell Consulting Engineers are excited to announce that we will be joining forces and consolidating our operations as of May 16, 2022. L&D has a long rich history of proudly serving our private and public clients and the majority of their Essex Junction, VT-based staff will be joining the growing team at TCE in their Williston and St. Albans Offices.

TCE is a locally owned and operated multi-disciplinary firm with a mission to provide expert design and guidance to our clients with VT land interests.

“L&D started in 1985, just 10 years after TCE started, and is the 1st place I ever worked in VT as an intern (1992-1994). I have enormous respect for L&D as a firm and their staff are all good, kind, hardworking people whom I’ve known my entire adult life. I know they care deeply about their clients and projects. I am thrilled to be able to join forces and help serve all of their clients as well as our existing clients for a brighter future. “

-Jeremy Matosky, P.E. President, TCE

Together we will be able to provide comprehensive site engineering, landscape architecture, environmental services, and land surveying to our current and new clients with a combined staff of over 25 talented professionals.
