

American Engineering Testing acquires Northern Technologies

February 28, 2022

American Engineering Testing, Inc. (AET), a leading provider of geotechnical, environmental, and forensic engineering; materials engineering and testing, petrography/chemistry services, and building sciences, announced today the acquisition of Northern Technologies, LLC (NTI), an engineering firm with complementary service lines. Effective February 28, 2022, staff from all NTI offices will become part of the AET team.

This acquisition will strengthen AET's North Dakota presence with new offices in Fargo, Bismarck, and Grand Forks and will fortify the existing AET St Paul, Minnesota location with new staff.

"The former NTI employees bring a broad range of geotechnical engineering and construction materials testing capabilities, along with a culture and commitment to teamwork, and client service comparable to our own," said Dan Larson, AET's CEO. "We welcome these talented professionals to the AET Team and will provide them with an environment where they can flourish".

Jeremy Cox, Vice President of AET's Western Region, added, "These former NTI locations will now have the full backing of AET, including increased resources, new technologies, a deeper bench of service line expertise, and increased capacity. We see this acquisition as a growth opportunity that will enable us to better serve existing and new clients throughout the Dakotas and Minnesota.

This acquisition is in line with the firm's history of strategic expansion. AET has always been committed to growing sustainably and in ways that meet client needs, strengthen service offerings, maintain company culture, and benefit our employee-shareholders. The acquisition adds about 40 employees to the AET team.
