

Anser Advisory expands national water capabilities to meet the moment for the \$55B water package within the Bipartisan Infrastructure Deal

November 17, 2021

Anser Advisory “Anser”, the 17th largest Program Management firm according to ENR, second fastest growing AE firm according to Zweig Group, and a Certified Great Places To Work organization is pleased to announce the expansion of their national water and wastewater consulting capabilities through the additions of Government Services Group, Inc. “GSG” based in Florida and Wallace & Associates Consulting, LLC “Wallace” based in California.

The combined Anser organization is now 750+ world-class leaders and innovators supporting mission-critical projects globally for some of the nation’s most prestigious organizations, including a growing number of water/wastewater essential infrastructure clients. In addition, Anser’s water consulting capabilities add value to owners of water infrastructure through advising on asset acquisition and disposition, finance strategy, CIP planning and execution through program, project, and agency construction management, as well as O&M consulting.

Anser’s CEO Bryan Carruthers noted, “We continue to execute our Vision 2025 strategy, and the additions of the GSG and Wallace organizations allow us to accelerate our ability to serve clients nationally within the growing water and wastewater markets. In addition, new funding through the American Rescue Plan and Infrastructure Investment and Jobs Act provides a once-in-a-generation opportunity to address the backlog of critical water infrastructure upgrades and improvements. However, it also provides new and complex challenges and regulatory requirements that must be navigated. Anser will be there every step of the way to support our clients in navigating these challenges with new ideas, insights, and most importantly, outcomes.”

“We collaborated to launch www.federaldollars.com, and we share clients, navigating the American Rescue Plan,” said Robert Sheets, CEO of GSG. “We are merging with the Anser organization to increase collaboration while expanding opportunities for our staff and leveraging our capabilities beyond Florida.” Carl Wallace, President of Wallace & Associates, added, “Our organization is a perfect complementary fit with the Anser California team where we have already identified opportunities for our staff to grow their responsibilities within Anser and added new clients which are best served through the joint capabilities of Anser and Wallace.”

Lewis, Ringelman & Fanyo acted as legal counsel to Anser Advisory and its affiliates, Cohn Reznick acted as financial advisor and BDO acted as tax advisor on both transactions. Morrissey Goodale advised Wallace Associates on their transaction. Ausley McMullen was legal counsel for GSG and Michael Krammer was financial advisor.
