

ARA Acquires the Consulting Division of Dynatest North America

February 5, 2020

Applied Research Associates, Inc. (ARA) is pleased to announce the acquisition of the Consulting Division of Dynatest North America, a leader in pavement engineering services, as of February 3.

Dynatest's Consulting Division has a successful history providing innovative pavement engineering services to roadway and airfield agencies, contractors, and design consultants. With a mission of improving pavement performance, they help customers test, evaluate, design, and maintain roadway and airfield pavements across North America.

The acquisition includes highly-skilled pavement engineers and technicians, a robust fleet of pavement testing equipment, and a comprehensive set of pavement analysis and management software tools. The organization brings decades of experience to further complement ARA's industry-leading pavement engineering capabilities, and it expands our geographic presence to include offices in Austin, TX and Ventura, CA.
