

Incorporation of Omni Design, Inc. to Cal y Mayor Group

April 19, 2022

Dear clients, business partners and colleagues, I am deeply excited to announce the incorporation of Omni Design, Inc. to Cal y Mayor Group, the first acquisition executed as part of our growth strategy.

This event is very important for the company's growth as it will strengthen Cal y Mayor's capabilities and financial performance over the short and long run. This will result in an overall stronger Cal y Mayor that will yield greater value to all of its stakeholders (clients, shareholders, employees, and business partners).

Omni Design has a long-standing reputation in its markets as a result of conducting business with a philosophy that is supported on quality, ethics, and a great team of professionals. We seek to capitalize on Omni's brand and capabilities in the buoyant U.S. market and revolutionary new infrastructures like energy storage sites and 5G antennas.

Being located in one of the world's most advanced infrastructure markets and just a couple of hours from Silicon Valley, we see a lot of value in pushing forward Omni's and Cal y Mayor's digitalization capabilities through BIM, cloud-based models, and the digital twin revolution that must deliver more value to infrastructure owners and developers.

We look forward to continuing doing business with you, please contact me if you have any doubts or business inquiries.
