

Compliance Field Services (CFS) acquires ECC Horizon's Mid-West Operations

Compliance Field Services Inc (CFS), a minority-woman owned environmental remediation and professional services firm, today announce the acquisition of ECC Horizon's Mid-West Operations located in Indianapolis, IN. This acquisition brings CFS additional professional service expertise in due diligence, property assessment, remedial design, remediation oversight and project management.

"Joining CFS provides an exciting opportunity to expand our capabilities in the mid-west and to leverage the strong technical expertise of ECC to provide high quality environmental consulting and implementation services. Given all the community work I do to support women STEM careers, it will also be rewarding to further the impact of a minority-women owned firm within the STEM landscape." said Linda Hicks, Vice President Mid-West Operations.

"ECC's Indianapolis office culture, clients, and skillset aligned extremely well with CFS, which we believe is a strong foundation for success said Christina Sun, President of CFS. "We brought in market leading talent last year to expand our business in the area of public infrastructure environmental work, and now with the integration of robust site assessment and remediation capabilities, we are well positioned for growth in the mid-west market. We look forward to providing exceptional value to our clients throughout the region.
