

Celebrating a New Year with Two New Confluence Offices

January 7, 2020

We're excited to share that Wolff Landscape Architecture (Downtown Chicago) and Land Elements (Downtown Fargo) are now part of Confluence. Our team welcomes the skilled design professionals from these renowned firms as we expand our reach into new markets, while also adding to the depth and breadth of our core capabilities.

Confluence is the point where everything comes together—people, energy and ideas—to create places full of life.

As we grow, our combined ideas and talents create an even stronger team—continuing our pursuit of excellence as one of the largest and most creative landscape architecture and planning firms in the Midwest with a network of 8 offices and over 70 professionals.

Welcome Wolff Landscape Architecture (Chicago)

Downtown Chicago has been forever enhanced as a result of the contributions of the Wolff Landscape Architecture (WLA) team. Since 1993, the firm has become well known for its design creativity and technical expertise—creating green roofs, open space planning, amenity decks and integrated structural landscapes that thrive in tough urban environments for both private sector and public sector clients throughout the Midwest.

Welcome Land Elements (Fargo)

The quality of life has been improved for clients, communities and campus settings throughout North Dakota as a result of the high-quality design services provided by the Land Elements team. Working on public sector and private sector projects, the team regularly collaborates with architects and engineers on a wide variety of project types, including complete street corridor plans, urban parks and plazas, and mixed-use development.
