

## Abesim celebrates partnership with EFI Global

*December 2, 2021*

Over the last 21 years, ABESIM has grown to become a successful team of specialists and a well-known brand in the field of 'Soil remediation expertise' and 'environmental management'.

Our growth during these years is clear evidence that ABESIM has the know-how and skills to carry out a wide variety of projects and has the appetite to undertake more business in our chosen field as well as explore new areas of interest.

At this pivotal time I have chosen this moment to allow the company to grow as part of Sedgwick within their EFI Global business.

In EFI Global, we have found a home with a shared vision for pragmatic and practical engineering solutions through a unique, professional approach. This integration of ABESIM's services within EFI Global offers the opportunity to grow much further, whilst maintaining the same exceptional service for our clients.

Our experts will continue to offer high quality solutions for our clients, but, as part of an established global business, new technologies and growth will provide the capacity to scale up our performance and services. The team and your point of contact do not change, but now we are small enough to care, and big enough to cope.
