

EwingCole Acquires Faisant Associates, Inc

January 5, 2021

EwingCole, one of the nation's leading architecture, engineering, and interior design firms, is pleased to announce the acquisition of Faisant Associates, Inc, an award-winning, Baltimore-based structural engineering firm offering specialized design expertise for buildings ranging from life sciences and healthcare to universities and sports facilities.

EwingCole's relationship with Faisant stretches back roughly 60 years, providing structural engineering services for many EwingCole projects. The firm attributes its success and longevity to its dedication to the enduring principles of engineering and the ability to master continually changing architectural design techniques and strategies.

"The structural engineers at Faisant have been a long-time, trusted design partner," said EwingCole Principal William Gaudreau. "We're thrilled to have them join our Baltimore team and look forward to offering this enhanced integration to our clients."

With an emphasis on complex new projects and large-scale renovations, EwingCole and Faisant have built a shared portfolio of projects throughout the region including Wake Forest Biotech Place, the Salisbury Animal Health Laboratory, Towson University, SECU Arena, University of Maryland BioPark 2 – Wexford Science & Technology, and the Advanced Chemistry Laboratory for the US Army Corps of Engineers.
