

## **We are thrilled to announce that we are beginning a new chapter in our journey.**

*March 9, 2022*

After a long and thoughtful process, our team is joining FHI Studio! With FHI Studio, we share a common culture, work ethic and commitment to service. This opportunity allows us to significantly expand the resources and services that we can bring to our loyal clients. We can now offer planning, environmental and engineering services with a greatly expanded team of over fifty professionals.

Our commitment to you will not change. You will still see the same familiar faces on your projects, and our project delivery systems will not change.
