

## **GdB Geospatial welcomes Geomaps International to our team!**

*January 17, 2022*

Christine Gayron, LS – President

"We are really excited to be expanding our geospatial services by bringing Geomaps into GdB. Geomaps has been a trusted partner of ours for my entire career. Their reputation for speed and quality is well known for remote sensing mapping products. It just makes sense to bring them in, create synergies, and empower our clients with more geospatial solutions."

Bill Crawbuck – Geomaps Founder

"Geomaps has specialized in aerial remote sensing services since 1967. Now that we are a part of the GdB team, we will expand our geospatial capabilities and position ourselves to better serve our clients for today and into the future."

GdB and Geomaps have been partnering since the 1990's and we are thrilled to announce that the entire Geomaps team is now a part of GdB Geospatial. Acquiring Geomaps aligns perfectly with GdB's vision to perform all geospatial services. Please continue to contact us for help with anything that has to do with measurement and mapping.
