

Geo-Logic Associates (GLA) is pleased to introduce its newest wholly owned subsidiary, Summit Water Resources, LLC (SWR), groundwater supply and water resource management consultants, based in Portland, Oregon.

March 1, 2022

SWR has specialized expertise in aquifer storage and recovery (ASR) investigations, testing, planning and operations, and water rights consulting in the Pacific Northwest. Summit is a newly-formed company that expands GLA's geographic footprint in the Northwest. With more than 75 years of combined professional experience, SWR professionals include:

Jason Melady, RG, CWRE—Principal Hydrogeologist and Business Unit Lead

Larry Eaton, RG, LHG—Principal Hydrogeologist

Ted Ressler, RG, CWRE—Senior Hydrogeologist and Water Rights Consultant

DeEtta Fosbury, RG—Senior Hydrogeologist

Ryan Dougherty, RG, PE – Project Hydrogeologist

SWR primarily supports Oregon municipalities, agricultural and industrial clients, and engineering and law firms requiring specialized water resource expertise. Noteworthy projects the hydrogeology experts at SWR have been involved in include managing ASR programs, overseeing groundwater exploration, and providing water rights support to ensure the Cities of Beaverton, Tigard, and Salem, Oregon, have reliable and resilient sources of clean water to deliver to their customers.
