

J.S. Held Expands Environmental, Health & Safety Practice with the Asset Acquisition of Environmental Profiles, Inc. (EPI)

November 4, 2021

J.S. Held, a global, multidisciplinary consulting firm, announced today that it has acquired substantially all of the assets of Environmental Profiles, Inc. (EPI), an environmental, health, and safety consulting firm with offices in Maryland and North Carolina.

EPI offers clients specialized expertise in toxicology, industrial hygiene, and safety consulting. The EPI team works with national law firms, corporations, insurance professionals, educational institutions, and government agencies to provide scientific consulting services, protocols, and programs that protect human health and the environment.

“The addition of EPI continues to elevate our ability to provide industry-leading environmental, health, and safety solutions to our clients,” said Paul Banks, Environmental, Health, and Safety Practice Leader for J.S. Held. “The knowledge and experience John Spencer and his team have in public health and environmental services is a strong addition to our industrial hygiene, toxicology, product stewardship, and safety service lines.”

EPI has nearly three decades of experience conducting research, audits, and assessments for matters involving human health, occupational/life safety, and the environment. Their team consists of Certified Industrial Hygienists (CIH), Certified Safety Professionals (CSP), and a toxicologist.

“Like J.S. Held, our team is dedicated to providing an exemplary client experience,” said John W. Spencer, CIH, CSP, President of Environmental Profiles, Inc. “By joining forces, we now have access to additional resources and diverse experts at J.S. Held, which furthers our ability to help clients navigate environmental, health, and safety risks, and regulatory requirements.”

EPI joins the J.S. Held team of more than 1,200 professionals around the world. Their clients will now have access to J.S. Held's suite of specialized services, including forensic architecture and engineering; property and infrastructure damage consulting; construction advisory services; global investigations; surety services; equipment consulting; restructuring, turnaround, and receivership; economic damages and valuation services; forensic accounting; and environmental, health, and safety services.
