

NEFCO COMPLETES ACQUISITION OF SIGMA ENGINEERING, INTL

April 21, 2021

NEFCO, a leading partner to the professional construction trade, has completed the acquisition of Sigma Engineering Int'l through the NEFCO Engineered Supports division.

Sigma Engineering Int'l Inc., founded in 1995 and located in Lincoln, Rhode Island, is a professional engineering company providing structural and piping services to Architects, Engineers, Utility Companies, Municipalities, Industrial and Commercial Plant Operators, Construction, and Steel Fabricators. Sigma Engineering is led by Senior Professional Engineer, John Tsikouras and Senior Design Engineer, Gary Rego.

The addition of Sigma Engineering allows the NEFCO Engineered Supports division to expand its engineering capabilities and geographical reach to all current and future NEFCO locations. This expansion will better serve NEFCO's customer base and will continue to drive NEFCO's growth and differentiation. "We are really excited to team up with Sigma Engineering. This partnership provides additional value for our customers and further supports our mission to be the single best partner for contractors whenever they build," states NEFCO Executive Vice President, Matthew Gelles.

"We are confident that the joint business with John and Gary will operate successfully by combining nearly 40 years of industry knowledge and experience with our current engineering staff. This partnership allows NEFCO to offer additional value-added engineering services to more customers in the markets we serve" adds NEFCO Senior Vice President - Operations & General Counsel, Ron Cipriano.
