

Orcutt | Winslow and TEG Architects join together to leverage capacity and market expansion

March 16, 2022

National architectural design firm, Orcutt | Winslow is pleased to announce the integration of TEG Architects (TEG). An architecture, interior design, and planning firm with a 50-year history of design leadership across the Southwest and Southeast, Orcutt | Winslow brings a seasoned team of experienced architects and designers together with TEG to broaden the firm's national platform.

"We believe that as we offer more, together, it will enable us to more powerfully impact our communities," Orcutt | Winslow Managing Partner, Erik Clinite, said. "This strategic growth expands our healthcare and higher education leadership to include more benefits, more capacity, more experiences, and more personality."

"We are known as architecture and interior design firms, strong in our regions, but we believe what we actually produce are transformative experiences in the communities we serve. This powerful integration of culture and talent gives our clients, present and future, the creative resources of 150+ design professionals."

This integration of talent and resources will bring expanded expertise in healthcare, K-12 / higher education, and senior living market segments, and will add additional institutional knowledge out of a Kentuckiana Metro hub. Together, the expanded capabilities will strengthen relationships within the local and national communities to provide a greater depth of offerings and help mitigate some of the challenges related to labor shortages.

"While we are very proud of the 50-year history of our firm, we also recognized that the next step for our team and clients is to build on a portfolio that will add even more value to our network and enable us to expand the value-based services that we offer," said Orcutt | Winslow Managing Partner, Carl Nelson. "TEG shares a passion for healthcare design and serving our clients one person at a time while growing relationships that are stronger than just one project. This expansion broadens and deepens our existing industry specializations, enabling us to offer more comprehensive services tailored to our clients."

In the area of healthcare, TEG has long held a prominent position as a national industry leader in master planning and design. TEG and Orcutt | Winslow both have long histories of design excellence and leadership in the health and wellness markets as well as K-12 and higher education, senior living, and Veteran Home design.
