

PHASE Associates Acquires Atlantic Environmental Assets

July 28, 2021

PHASE Associates, LLC (PHASE Associates), a leading provider of Environmental Health and Safety (EHS) consulting, training and professional outsourcing services, has acquired assets of Atlantic Environmental, Incorporated (Atlantic Environmental). Atlantic Environmental is a Dover-based EHS consulting firm with expertise in EHS solutions. The former owner, Mr. Robert E. Sheriff, MS, CIH, CSP, retired and closed the business as of January 2021. Mr. Sheriff was highly respected in the aspects of environmental control, indoor air quality, and industrial hygiene in a wide variety of occupational areas.

“We are excited about this acquisition”, states Gary Schwartz, President, MS, CIH, CSP of PHASE Associates. “This acquisition is part of PHASE Associates’ growth strategy to further expand the company’s EHS service offerings and to extend our geographic reach in the surrounding states of New York, New Jersey, Pennsylvania, and Connecticut, as well as across the United States.” Mr. Schwartz continues, “There are so many similarities with both companies in offering Environmental Health and Safety solutions that it seemed natural for us to acquire the assets of Atlantic Environmental. Their clients will be offered the same EHS consulting services and training and be managed with the same professionalism as they received while working with Atlantic Environmental.”

The overlap in EHS services includes but is not limited to the following:

- Industrial Hygiene Surveys
- Noise Surveys
- Ventilation Surveys
- Exposure Air Monitoring
- Indoor Air Quality Testing
- Respirator Fit Testing and Training
