

Phronesis Engineering has acquired the civil-related consulting services of Lauro Group

September 18, 2021

On behalf of The Lauro Group, I am proud to announce that Phronesis Engineering has acquired the civil-related consulting services of Lauro Group. Phronesis Engineering will continue with the same level of integrity, transparency, trust, and professionalism as The Lauro Group has delivered for over a decade. Moving forward, The Lauro Group will concentrate its focus on real estate acquisitions and development.

Spearheading Phronesis will be Anthony Stancanelli, PE, a strong and multi-talented professional within the real estate industry. Anthony has over 20 years of civil engineering experience, having worked at some of the well-known civil firms including Bohler, VHB, BBV and The LiRo Group. I am confident that Anthony's extensive background and industry relationships, combined with his dynamic personality, will be a tremendous asset to the future growth of Phronesis Engineering! I look forward to working with Anthony and being a part of Phronesis' future.
