

Outland Design Is Now A Division Of Ruekert & Mielke, Inc.

May 5, 2021

We are excited to share that Outland Design, LLC has been acquired by Ruekert & Mielke, Inc. (R/M), a local civil engineering firm celebrating its 75th year of service to Wisconsin communities and organizations.

R/M is a 100% employee-owned, Wisconsin-based firm that understands the unique infrastructure, regulatory, and environmental needs of Wisconsin's producers, communities, and businesses. With just over 100 employees, R/M is a small firm with big capabilities, and they operate every day with service and family at their core.

What does this mean for you?

The entire Outland Design team has joined R/M, and our dedication to you, your family, and your operation remains our top priority. You can now expect us to provide a more extensive range of services, maintain our working understanding of regulations, and continue to provide the innovative, time-sensitive solutions you've come to expect.

In 2011, when Outland Design was founded, we promised ourselves that we would contribute more than just the industry standard engineering and permitting services. Our decision to join R/M supports our efforts to innovate as the industry does, provide solutions that keep your organization thriving, and support a team of experts that you can rely on.
