

Nelson Engineering Joins Salas O'Brien

April 28, 2022

We're excited to announce that Florida-based Nelson Engineering has joined the company, further strengthening Salas O'Brien's expertise with federal clients and creating a combined firm of more than 50 offices, over 1,500 team members, and 360 registered professionals.

The Nelson team's capabilities and portfolio complement Salas O'Brien's existing work in the science and technology and federal government markets. The merger increases our combined team's ability to provide comprehensive, integrated, multi-disciplinary engineering services.

As the next step in Salas O'Brien's strategy to be local everywhere, with international resources, the Nelson team will continue to be managed by its current leaders and will adopt the Salas O'Brien name after a transition period.

The merger closed on April 15, 2022, and news was shared recently with both the Nelson and Salas O'Brien teams.

"Nelson Engineering brings an impressive project portfolio and impeccable client reputation," said Srimi Neralla, managing principal and leader of Salas O'Brien's federal services. "We are excited to see this talented team of professionals grow within Salas O'Brien, and we look forward to all we will accomplish together."

Salas O'Brien continues to grow as part of an ambitious plan to create the most respected engineering firm in the world, as measured by our clients and team members. Nelson represents the third merger in 2022 for Salas O'Brien.
