

## **SCHNABEL ENGINEERING ACQUIRES DEERE & AULT CONSULTANTS, INC.**

*March 10, 2020*

Schnabel Engineering announces the acquisition of Deere & Ault Consultants, Inc. (D&A), a Water Resources, Civil, and Geotechnical Engineering services firm with locations in Longmont, Colorado and Boise, Idaho. The addition of these two locations will expand Schnabel's national presence, increasing the companies' capabilities, and benefit clients and partners. The companies merged on February 29, 2020.

Founded in 2005, Deere & Ault is sought-after for water resources, geotechnical, dam, tunnel, and mine reclamation expertise. Led by industry veterans with decades of experience, the company provides investigation, analysis and design solutions for challenging projects. Deere & Ault brings a diverse portfolio of clients to Schnabel's footprint, expanding the company's skill set and encouraging new opportunities for the combined firms within the Rocky Mountain and the Western regions for Schnabel, as well as the East coast for Deere & Ault.

*"I have known and respected Schnabel Engineering for many years. Over that time I have admired their technical and business capabilities and their many project accomplishments," said Don W. Deere, Chairman of the Board at Deere & Ault Consultants, Inc. "I am excited at the merger of our two fine organizations and I am certain that we will continue to serve our clients well and accomplish many great things over the coming generations."*
