

SCHEMMER BEGINS THE NEW YEAR WITH A NEW LOCATION

January 17, 2021

MSH Architects, an architectural firm in Sioux Falls, South Dakota, has joined Schemmer, expanding the nine-person architectural firm to a 120+ person full-service architectural and engineering firm.

“MSH will not only complement Schemmer’s existing architecture expertise, but also open a sizable geographic market in South Dakota. Their focus on providing exceptional professional services and sustaining long-lasting client relationships aligns perfectly with Schemmer’s mission,” said Steve Kathol, PE, SE, Schemmer President and Chief Executive Officer.

MSH Architects has been providing architectural services in South Dakota and beyond for the past 32 years. Throughout that time, they have developed a highly qualified team of architects, project managers, technical and administrative staff, who are motivated and committed to improving the built environment through excellent design across numerous markets.
