

Wunderlich-Malec Acquires mGrid™

June 1, 2020

Wunderlich-Malec Engineering, Inc. (WM) announces the acquisition of IPP Connect, LLC's intellectual property and the joining of their staff as a new WM business focused on providing innovative solutions, technology, and tools for achieving aggressive energy cost reduction, efficiency, and renewable goals. The patented mGrid™ technology provides access to lower-cost wholesale renewable power as well as software tools for helping utilities make the business case for investments in renewable delivery systems.

Since 2009 IPP Connect's staff has provided over 200 C&I and Utility energy assessments/plans and significant energy market, technology, and rate expertise including sophisticated in-house energy and financial modeling capability. They have helped customers meet their sustainability and energy goals while reducing energy costs by 40% to 60%.

In a strategic initiative, Wunderlich-Malec acquires IPP Connect's mGrid™ technology to expand its consulting services enabling commercial, industrial and utility customers to meet their sustainability and energy goals while reducing energy costs.
