

Huckabee announces growth in the Southwest

August 1, 2022

As part of a strategic vision to grow our impact beyond Texas, Huckabee is excited to announce a partnership with TSK Architects, a 62-year-old firm focused on education and other public sector work with offices in Nevada, Arizona and California.

TSK is joining our nationally recognized network of architecture and engineering professionals who are committed to creating environments that inspire. Together, we are more, and we are poised to create an impact of excellence on the communities we serve!

The investment will help Huckabee expand our resources to serve educational clients in the southwestern region of the country. It will also help TSK grow their civic and federal practices with enhanced services, technology and innovative approaches to planning, design and project delivery.
