

CHA Acquires North Carolina-based Frazier Engineering

October 13, 2022

We are pleased to announce CHA has acquired Frazier Engineering, a civil engineering firm focused on sanitary sewer system assessments, design and rehabilitation. Frazier Engineering is based in the Charlotte, North Carolina area, with 45 employees. Frazier is known for highly specialized work on sewer system condition assessment, flow monitoring, rehabilitation design and construction management, and sewer system planning and design. The firm also has two offices in South Carolina and provides services in Virginia and Tennessee.

“Frazier Engineering is a great strategic addition to our growing water infrastructure team and brings talented technical staff and specialized capabilities that are in demand by many municipal clients,” said Jim Stephenson, CEO of CHA Holdings. “Water and sewer infrastructure is in a critical state for many municipalities, and Frazier will support our efforts to continue building a leading national firm assembling the skills necessary to address infrastructure challenges across the U.S.”

Frazier Engineering President Aaron Frazier said, “CHA has a strong reputation for delivering quality solutions with exceptional client service. We share that commitment to quality and exceeding our clients’ expectations, and we’re excited to be part of a firm with diverse national capabilities and a large geographic footprint. This acquisition will open up new and exciting opportunities for our employees and expand the services we can provide to our clients.”
