

DCCM acquires Urban Engineering and Urban Civil

November 3, 2022

DCCM, a national provider of design, consulting, and program & construction management services based in Houston, Texas, is pleased to announce the acquisition of Urban Engineering and Urban Civil.

Both Urban Engineering and Urban Civil are industry leaders in public works, land and site development, and surveying work for public and private clientele along the Texas Gulf Coast and other regions. The combined organization will continue to operate under the Urban Engineering name, which was established in 1965. In making this acquisition, DCCM is expanding its existing partnership with industry veterans Chip Urban and Jim Urban, who will continue in their current leadership roles.

“The acquisition of Urban Engineering is an exciting addition to the DCCM family. We are delighted to have found a new partner whose vision aligns with ours,” said James F. (Jim) Thompson, PE, DBIA, CEO of DCCM. “The experience Urban Engineering brings will allow us to expand our engineering services capabilities further as we continue to build our company to provide the best engineering services for our customers.”

“Becoming part of the DCCM family is a fantastic development for Urban Engineering and its stakeholders,” said Chip Urban. “This alliance with DCCM unlocks tremendous opportunity for our staff and our customers.”
