

Chrisland Engineering acquires Matthew & Hockley Associates

January 5, 2023

Chrisland Engineering, a consulting engineering firm which specializes in land planning, municipal consulting, structural engineering, and delegated design services, has now added surveying to its list of services with the acquisition of Matthew & Hockley Associates.

“Chrisland Engineering is excited to add Matthew & Hockley Associates to our growing family. Matthew & Hockley Associates has been serving the Lebanon community for 75 years and we look forward to continuing to offer experienced surveying and engineering services to Lebanon and surrounding counties.” - Joshua T. Weaber, P.E. – President

Chrisland Engineering was started in 2017 and provides a wide range of land planning services tailored to their clients’ needs. A few of their services include: subdivision and land development plans; Post-Construction Stormwater Management Plans; and Erosion and Sediment Pollution Control Plans. They also provide several other related services such as: water and sewer service planning; environmental permitting; driveway permitting; grading plans; landscaping plans; stormwater management; and flood studies.

With the addition of Matthew & Hockley Associates, Chrisland Engineering will now be able to offer topographical surveys, property surveys, flood insurance elevation studies, construction stakeout, and on-lot sewage disposal design. The acquisition will allow Chrisland Engineering to offer its clients a full range of land development services from expert staff.
