

## HRP Acquires Progress Environmental Group, Inc.

*January 9, 2023*

HRP Associates, Inc., a national environmental consulting, and engineering firm, has acquired Progress Environmental Group, Inc., an environmental and ecological consulting firm in Winston-Salem, North Carolina. The official announcement was made at HRP's annual company meeting in December 2022. The move to acquire Progress Environmental, Inc. first started in the spring of 2022 upon recognition of significant synergies between the two companies. The process took about five months, and the deal was signed in November 2022.

"Our acquisition of Progress Environmental Group, Inc. brings significant senior business leadership talent, strategic office locations in Houston, TX and Winston Salem, NC, and access to cutting edge proprietary remedial technology," said Daniel Titus, HRP's CEO, "and Progress Environmental's leadership is an excellent cultural fit with HRP, which is of the utmost importance to us as we evaluate talent and acquisition opportunities."

The acquisition of Progress Environmental Group, Inc. fits into HRP's strategy to expand their midmarket presence nationally and increase their brand penetration. HRP can expand their service footprint to key geographic locations where their primary practice areas are in high demand and local business environs are competitively attractive. They expect that the key attributes of Progress Environmental, Inc. when coupled with HRP's larger service profile will enable them to increase their responsive delivery of services to both HRP and Progress Environmental Group, Inc. clients and a universe of new clients.

"I'm excited to have the opportunity to deliver our service, driven by a unique internal culture, to a whole new area of the market. We are going to turn some heads." said Daniel Titus.
