

Carlson McCain Broadens its Areas of Environmental Expertise

November 8, 2021

Carlson McCain is proud to add E3 Environmental energy industry services to our proven areas of environmental expertise.

On January 15th, 2021, Carlson McCain acquired E3 Environmental, LLC. Before this acquisition, Carlson McCain had a long-term relationship as a sub-consultant to E3 dating back 10+ years.

About E3 Environmental:

E3 was founded by William McCarthy in 2009, with its primary focus being to provide specialized environmental services to the energy industry. E3 provides turnkey services to the industry from siting and construction through restoration and operations. Their clients offer energy services to various sectors, including oil and gas, electric transmission, wind, and solar.

Specific services include:

- Siting, Licensing, & Permitting
- Environmental Inspection & Compliance Monitoring
- Pipeline Integrity & ROW Maintenance Services
- Operations Support
- Environment Field Surveys
- GIS Analysis & Interactive Mapping

Integrating E3's capabilities with Carlson McCain has strengthened our collective position within the energy services industry and will help us remain a strong partner for energy firms throughout the Midwest.
