

## Rossi Group acquires Rybinski Engineering

*January 31, 2023*

Rossi Transportation Group, Inc. (Rossi Group), a woman-owned consulting firm providing civil / transportation engineering and planning services, is pleased to announce the acquisition of Rybinski Engineering, LLC (Rybinski Engineering), a traffic engineering firm with ties in Delaware, Pennsylvania, and Maryland.

Founded in 2012, Rybinski Engineering is a certified woman-owned Disadvantaged Business Enterprise (DBE) specializing in traffic engineering services for US DOT funded projects in the Mid-Atlantic. The firm's capabilities include traffic engineering, intelligent transportation systems (ITS), active traffic management (ATM) systems and tools, transportation system design, transportation management plans (TMPs), and traffic data analytics. After announcing last year that it would cease operations in 2023, discussions began for Rossi Group to acquire the organization. As part of the acquisition, Holly Rybinski, PE, PTOE, former Principal-in-Charge at Rybinski Engineering, will join the Rossi Group team.

Rossi Group President, Rita Ossiander, PE, AICP, stated about the acquisition: "The acquisition of Rybinski accelerates our growth across transportation sectors and strengthens our capabilities in select strategic regions. We expect a smooth transition process both internally, and more importantly for our clients. We look forward to continuing and building on the great relationships Rybinski has established."

Rybinski Engineering's founder, Holly Rybinski, commented: "I am happy to team up with another woman-owned business with integrity and complementary strengths in our region. We've both been working hard in the same geographic footprint to provide sustainable transportation solutions while fostering an enjoyable environment. I'm thrilled about the long-term continuity this acquisition brings to my clients."
