

T&B Systems Joins Trinity Consultants

March 30, 2023

We are thrilled to announce that, as of March 2023, Technical & Business Systems, Inc. (T&B) has joined the Trinity Ambient Monitoring family. Established in 1986, T&B is based in Santa Clarita, Placerville, and Berkeley, California, and offers ambient monitoring and auditing services for both government and private clients in California and throughout the country.

We have a long history of working collaboratively with the T&B team on various projects dating back more than twenty years, so this joining of forces greatly enhances Trinity's monitoring capabilities. By joining Trinity Consultants, our clients gain access to additional resources and industry-leading knowledge. As environmental justice, ESG, and other regulations increase the need for specialized monitoring, Trinity stands in an excellent position to better meet the ever-evolving needs of our global clients.

We are proud of the continued growth and success and remain committed to offering our customers tailored solutions to meet their unique business and operational challenges.
