

Bentley Systems Announces Acquisition of EasyPower®, Leader in Power Systems Engineering Software

February 23, 2023

Bentley Systems, Incorporated (Nasdaq: BSY), the infrastructure engineering software company, today announced it has acquired EasyPower, a leading developer of design and analysis software tools, including arc flash solutions, for electrical engineering professionals.

Since its founding in 1984, Portland, Oregon-based EasyPower has innovatively combined graphics-based modeling and analysis in order to make solving complex electrical engineering problems ever more straightforward and accessible. EasyPower products are primarily used for designing, analyzing, and monitoring power distribution systems serving industrial and commercial facilities, to ensure safety, reliability, and regulatory compliance.

Bentley's acquisition of EasyPower, to extend integrated and iterative power systems design and analysis for infrastructure digital twins of every type, broadens its comprehensiveness in infrastructure engineering. With an increasingly electrified future and with disparate and widely distributed energy resources on both sides of "the meter," all infrastructure assets will benefit – in performance, economics, safety and resilience – from continued simulation and assessment of power distribution conditions and designs over their project and operating lifecycles. Priorities for Bentley Systems will include integrating EasyPower's schema and digital workflows with Bentley's OpenBuildings, OpenFlows, OpenPlant, OpenRail, and Bentley Raceway and Cable Management applications.
