

Verdantas Acquires Clemson Engineering Hydraulics to Strengthen National Position in Physical Hydraulic Modeling and Specialty Engineering Testing Services

July 13, 2023

Verdantas, a private-equity-backed solution provider of sustainable infrastructure engineering, planning, and environmental science services supports clients' sustainability, resiliency, and strategic infrastructure objectives, announced today that it had acquired South Carolina-based Clemson Engineering Hydraulics.

The acquisition will expand Verdantas' market and geographic footprint and will also add to the company's depth and capabilities in the water resources and hydraulic engineering space. Clemson Engineering Hydraulics is a well-respected firm with a long history of providing high-quality services to its clients. The company's expertise in physical hydraulic modeling and water resources engineering will be valuable to Verdantas' team. The acquisition is a strategic move for Verdantas, as the company is confident that it will help grow its business and further capitalize on the opportunities in this market as a specialty provider.

"We are excited to announce the acquisition of Clemson Engineering Hydraulics, which will further strengthen our position in physical hydraulic modeling and water resources engineering and will be a valuable addition to our team," said Gerry Salontai, CEO of Verdantas, "we are confident that this acquisition will help us to serve our clients better and grow our business."

This exciting transition marks not just the next chapter in our company's story but an extraordinary opportunity to serve our clients on a larger scale, with increased resources and the ability to innovate more rapidly," said, Dave Werth, President, Clemson Engineering and Hydraulics, "We've had numerous conversations over the years about how Clemson and Alden Research Labs might come together in some way for the benefit of our clients and our employees—now that it is the reality, I'm very much looking forward to the upcoming opportunities it will create for both our employees and our clients ."
