

Bernhard Capital-Backed Environmental Systems Group Acquires ELOS Environmental

October 19, 2023

Environmental Systems Group, an industry-leading platform providing comprehensive environmental service solutions, today announced the acquisition of ELOS Environmental (“ELOS”), a leading provider of environmental consulting services. Financial terms of the transaction were not disclosed.

Established in 2006 and based in Hammond, Louisiana, ELOS provides a diverse range of environmental consulting services across natural resources, Geographic Information Systems (GIS) and mapping, cultural resources, industrial hygiene services, waste management and disaster recovery to a wide range of customers throughout the Southeastern U.S.

Bernhard Capital Partners, a services and infrastructure-focused private equity management firm, established Environmental Systems Group in July 2022 to provide a comprehensive suite of environmental and technology-driven solutions to meet the increasingly complex needs of both public and private clients across industries. As Environmental Systems Group’s third acquisition, ELOS will expand the platform’s diversified environmental service offerings and strengthen the company’s geographic presence in the Gulf Coast region.

“We’re delighted to welcome ELOS and their expert team to Environmental Systems Group’s growing platform,” said Dirk Applegate, Chief Executive Officer of Environmental Systems Group. “With the addition of the ELOS team’s deep environmental consulting capabilities, we are continuing to build a comprehensive, one-stop-shop for environmental and technology-enabled solutions that help customers across industries navigate an increasingly challenging landscape and provide our staff with exciting opportunities to collaborate on complex projects and broaden their professional growth.”

“Joining the Environmental Systems Group platform is an exciting opportunity for ELOS to deliver an enhanced and uniquely integrated set of capabilities to new and existing customers,” said Lucas Watkins, President and a Founding Principal of ELOS Environmental. “We look forward to joining our technical expertise and ability to support customers at the local, state, and federal level with Environmental Systems Group to continue delivering excellent, environmentally-focused results that our clients have come to expect.”
