

Trinity Consultants Acquires WAID Environmental

October 16, 2023

Trinity Consultants announces that Waid Environmental, a Texas-based engineering and environmental services firm specializing in air quality, emissions control, permitting, and compliance, has joined its Environmental Consulting pillar of business.

Since its inception in 1978, Waid has helped clients navigate an increasingly complex environmental landscape by developing and expediting permitting strategies and reviews, helping resolve compliance issues, providing comprehensive solutions to environmental challenges and onsite support, reducing liabilities by identifying potential non-compliant situations, and optimizing and automating compliance management procedures. This acquisition will further strengthen Trinity's position as a market leader in the EHS space.

"Waid shares our ambition and promise to deliver project excellence, with a culture of responsiveness, quality, and value, ensuring our people have the technical capabilities and expertise needed to quickly solve the most complex environmental challenges," said Shishir Mohan, managing director, Trinity Consultants, Southeast and Gulf Coast. "We're excited about the cultural synergies presented by their highly experienced staff and strong client base, and are delighted to welcome the Waid team to the Trinity family."

The Waid leadership team, including President and Principal Engineer Jason Graves, will remain intact, and the teams will merge offices both in Houston and Austin, Texas.

"We're thrilled to join forces with a global environmental consulting firm that will build on and extend our ability to help clients navigate the highly complex regulatory landscape, and deploy and execute solutions to their most complicated air quality challenges," said Graves. "This partnership allows us to provide high impact, high value services and the technical rigor we're known for, on a larger scale."
