## Coleman Engineering Merges with Sanderson Bellecci

Natick, MA (December 19, 2023) – Sanderson Bellecci has merged with Coleman Engineering of Roseville, California. Sanderson Bellecci was formed by the recent mergers of Sanderson Stewart, Bellecci, and Summit Engineering, with offices in Billings, Bozeman and Helena, Montana; Fort Collins, Colorado; Concord and Pleasanton, California; Elko and Reno, Nevada.

The new partnership with Coleman Engineering adds strength in water and wastewater utilities design and contract operations, to Sanderson Bellecci’s already comprehensive multi-disciplined services, which include civil infrastructure, geotechnical and environmental engineering, community planning, construction management, surveying and mapping, landscape architecture, and communications and visualization services for public and private clients and communities across the West. Coleman Engineering will continue to operate under its current brand name but will function as a single enterprise under the leadership of Sanderson Bellecci’s CEO Michael Sanderson and the rest of the firm’s current local owner/principals.

“We are so excited to add Coleman Engineering to the Sanderson Bellecci family of companies,” said Michael Sanderson, CEO. “This merger with Coleman continues our expansion of services for our clients, allowing us to offer world-class water and wastewater expertise and positions us to better serve our clients with additional locations throughout the west.”

Chad Coleman, founder of Coleman, shares that enthusiasm, stating “This merger was not required, but once we met the Sanderson Bellecci team and explored the possibilities it was easy to see the benefits and to imagine our professionals thriving together. We anticipate significant benefits to our team members and for our valued clients as this team grows and prospers together.”
