

AMA GROUP IS PLEASED TO ANNOUNCE THAT WE HAVE ADDED SKYLINE ENGINEERING TO OUR GROUP OF COMPANIES!

Skyline is a well-recognized brand in the NY/Metropolitan marketplace, offering (a) MEPS Design, (b) Commissioning and (c) Special Inspection services. The MEPS and Commissioning teams consist of a seasoned staff having an abundance of residential experience, both market and affordable, which will bolster AMA current expertise. Moreover, from a meaningful strategic growth standpoint, this acquisition adds an entirely new service to AMA offerings in the form of Special Inspections, for which Skyline is a Licensed NYC Class 1 Special Inspection Agency. With Special Inspections becoming more prevalent in major US cities, the goal is for Skyline to grow the service both locally as well as to other regions that require Special Inspections (e.g. Florida, California, Pennsylvania and Texas).

Skyline was founded and is led by Matt Wavro, who is a talented 30+ year veteran of the industry, having started his career at JBB Engineering in NYC before founding Skyline and growing to its current 30+ person size. Matt is now part of AMA Group senior leadership and will continue to lead the Skyline team, with particular focus on Special Inspections and Commissioning.

We welcome Skyline to the AMA Group portfolio and look forward to being able to better serve our clients and industry partners!

Onward and Upward!

Arthur Metzler, PE
Founder & CEO
