

Engineering System Solutions (ES2) joins IMEG

January 3, 2024

Engineering System Solutions (ES2) with offices in Idaho Falls, Las Vegas, and Sacramento, has joined IMEG. The year-end merger enhances the national, full-service engineering firm's existing services in Las Vegas and California while expanding the geographic reach in the Northwest.

ES2 has served clients for decades, providing structural, mechanical, electrical, and plumbing design solutions. Their market sector experience includes commercial, corporate, education, government, healthcare, hospitality, and housing, among others.

"We are excited to add ES2 and deepen our bench of expertise in several markets," said IMEG President/CEO Paul VanDuyne. "ES2 has built a solid reputation for providing high-quality design and, like the rest of IMEG, is community- and client-centric. We look forward to what this merger means for our continued growth in the western part of the country."

Firm leaders Justin Judy and Greg Meyer said their teams are looking forward to being part of IMEG and the ability it brings to offer clients an expanded, full line of engineering services—all with the same local teams. Judy and Meyer will continue to serve in regional leadership roles and the firm will operate from its existing locations, doing business as Engineering System Solutions (ES2), now IMEG for the foreseeable future.
