

RMA Companies Acquires Black Eagle Consulting

February 8, 2024

RMA Companies (“RMA”) today announced the acquisition of Black Eagle Consulting (“Black Eagle”), a provider of geotechnical and construction inspection services based in Reno, Nevada. Since August 2021, RMA has now completed 12 acquisitions of leading firms throughout the U.S. as it builds a national platform for testing, inspection, and related services to support the development and maintenance of critical infrastructure.

With over 27 years of experience in Northern Nevada, Black Eagle has established itself as a regional leader in geotechnical engineering, construction materials testing, inspection, and advanced non-destructive examination services. Operating out of Reno and Carson City, Black Eagle serves federal and state agencies, municipal public works departments, power and utility agencies, mining companies, engineers, contractors, and developers investing in the built environment.

“Black Eagle is another great addition to the RMA family of companies,” said Ed Lyon, CEO of RMA Companies. “Their local capabilities and laboratory facilities in Reno and Carson City enable RMA to serve a fast-growing region of Nevada and expand our non-destructive examination capabilities. The combined resources of our teams in Nevada will allow us to better serve our clients across the state and throughout the broader southwestern United States.”

“This acquisition marks an exciting next chapter for our team at Black Eagle,” said Remo Osmetti, founder of Black Eagle. “As we look towards the future, we are excited to be able to provide expanded opportunities for professional growth for our team members and expand upon our service offerings to our clients. Our clients benefit, our team members benefit, and we bring valuable services to RMA. This is a big win for everyone involved.”
