

B&P and Linton Engineering Have Combined Forces

May 1, 2024

Bennett & Pless, Inc. and Linton Engineering, LLC have combined forces and merged to extend high-level structural engineering services beyond the southeast and into the Mid-Atlantic region.

“With Bennett & Pless, we have discovered a firm that shares a common value about our people, our culture, and the client experience. We have built a solid reputation over two decades as one of the go-to structural engineering firms in Northern Virginia for some of the most challenging local projects. This merger with the largest structural engineering firm in the southeast gives us a combined structural engineering strength and broad experience across nine office locations that will enable us to continue to push to become the go-to firm for innovative and complex design work.”

“The merger of Linton Engineering with Bennett & Pless extends our reach and single-discipline structural engineering expertise into the greater Washington, D.C. metro area. With a location in the heart of the Data Center capital of the world, our new Loudoun County, VA office allows us to better service our data center clients in the firm’s largest market sector of service. We welcome the team’s diverse, innovative, and technology-forward experience and specialized knowledge of the local market, which will keep us on the leading edge of design. -Dave Linton, PE, Founder of Linton Engineering, LLC

In a joint statement, Linton and Gazzola said, “The combined strength of our 170+ structural engineering professionals positions us to take on very large, complex and mission-critical projects for clients across the national capital region.” -Ed Gazzola, PE, CEO of Bennett & Pless
