

Michael Baker International, LLC Strengthens and Expands Business with Four New Acquisitions

June 6, 2024

Michael Baker International, a global leader in engineering, planning and consulting services, today announced that its parent company, Michael Baker International, LLC, has acquired four innovative companies that will enhance and grow its portfolio of services and expand its client base to new markets: MLU Services, Inc., Digital Data Technologies, Inc., Infinity MEP+S Consultants, and Gavan-Graham Electrical Products.

“The acquisition of these four innovative and industry-leading firms allows us to boldly advance our goal of transforming Michael Baker International into a full-service engineering and consulting firm,” said Brian A. Lutes, Chief Executive Officer at Michael Baker International. “The companies we are acquiring are strong brands in their respective sectors and will bolster Michael Baker’s focus on expansion in the commercial space and complement key growth segments across the firm.”

Key growth segments include the rapidly evolving Government Technology Sector (GovTech), which focuses on automating government workflows, streamlining communications and backing up data via secure systems; and Sustainable and Resilient Solutions (SRS), focusing on the full continuum of services for the creation of vertical infrastructure.
