

Fuss & O'Neill Acquires Bayside Engineering

August 1, 2024

Civil and environmental engineering firm Fuss & O'Neill is proud to announce the acquisition of Bayside Engineering. This strategic investment establishes a fourth Massachusetts office for the firm and increases Fuss & O'Neill's service offerings in the metro-Boston area.

Bayside Engineering was established more than 50 years ago and has an established presence in the traffic, transportation, survey, construction, and bridge engineering markets. The firm is well regarded for their knowledge and experience advancing projects through the regulatory process, which translates to project savings. The Woburn office will continue to provide its clients with exceptional, personalized service, while now being able to offer the full suite of Fuss & O'Neill's multidisciplinary services.

Bayside Engineering's former president, Norman Brown, PE, PLS notes that the opportunity to join Fuss & O'Neill was the right decision for the company.
