

Live Oak Engineering, Inc. Announces Acquisition of Dunn & Associates, Inc.

August 23, 2024

Live Oak Engineering, Inc., a multidiscipline engineering firm headquartered in Birmingham, AL, is delighted to announce the acquisition of Dunn & Associates, Inc., a leading civil engineering and urban planning firm located in Jacksonville, Florida.

As Northeast Florida's premier engineering firm, Dunn & Associates, Inc., has extensive experience in providing a mix of civil engineering, planning, and design services to a long-standing customer base.

Live Oak's acquisition of Dunn & Associates represents a significant step forward in their mission to provide even more comprehensive and innovative solutions to their clients across the Southeast.

"Growing our engineering services in the Jacksonville area is exciting enough, but the fact that we get to do it with like-minded people is what makes this expansion special." said Patrick Plourde, P.E., President/Owner of Live Oak Engineering. "From the moment I founded Live Oak in 2007, I knew that being responsive to my clients' needs and promoting my employees' well-being were my top priorities, and when I met the leadership team at DAI earlier this year, it didn't take long to see that they share the same values."

Vince Dunn, P.E., President of Dunn & Associates, expressed his enthusiasm for the merger. "Dunn & Associates, Inc. is excited to join the Live Oak Engineering family. Their commitment to excellence and client satisfaction, paired with Dunn & Associates' similar core values, will benefit our clients and employees for years to come."

Following the acquisition, clients of both firms can expect a seamless transition with the same high level of service and dedication they have come to rely on. The combined entity will continue to prioritize innovative solutions, quality control, and timely project delivery, ensuring that all stakeholders benefit from this exciting development.
