

Trinity Consultants Acquires Environmental Compliance & Safety

August 08, 2024

We are pleased to announce that Environmental Compliance & Safety, Inc. (ECS), a Mississippi-based consulting company with specialized expertise in environmental and safety, has joined Trinity's Environmental Consulting business pillar.

Since its inception in 2002, ECS has helped clients navigate an increasingly complex environmental landscape by developing air, water and hazardous waste permitting strategies and evaluations. Their solutions help clients achieve compliance with regulatory mandates via comprehensive monitoring and reporting; providing rigorous assessments and sampling; reducing liabilities by identifying potential noncompliant health and safety issues; and offering virtual and on-site training opportunities. This acquisition will further strengthen Trinity's position as an EHS market leader in the Gulf/Southeast.

"ECS shares our ambition and ability to deliver project excellence and exceptional responsiveness, rooted in local compliance requirements and strengthened by a broader understanding of global environmental and safety issues and their impacts on the client's business," said Shishir Mohan, Trinity Consultants' Managing Director of the Gulf/Southeast. "Their esteemed reputation, synergistic cultural values, and highly skilled staff will be an asset to our people, clients, and partners around the world. Together, our combined expertise will allow clients to make informed decisions, faster and easier, with a higher degree of confidence."

ECS's leadership team, including principals Kirk Shelton and Brian Ketchum, will continue to play a key role in Trinity's environmental consulting division, reporting to Mohan. The teams will continue to operate both offices in Sherman and Brandon, Mississippi.

"We're thrilled to join forces with a global environmental consulting firm that will build on and extend our ability to help clients navigate the highly complex regulatory landscape and deploy and execute solutions to their most complicated environmental and safety challenges," Shelton said. "This partnership allows us to amplify our strengths and expand our technical expertise, talent and training, client base, and geographic footprint in monumental ways."
