

## Benchmark Engineering and FOCUS Engineering Join Bolton & Menk

*January 09, 2025*

In continued commitment to our clients and in support of our purpose of building safe, sustainable, and beautiful communities, we are happy to announce that as of January 1, 2025, Benchmark Engineering and FOCUS Engineering have joined the Bolton & Menk Team.

Since 1993, Benchmark Engineering has provided civil engineering and land surveying services throughout the Iron Range and beyond. With a commitment to quality and timely service, Benchmark Engineering has built a portfolio of trusting clients that brings continued opportunity for long-term success. This acquisition brings with it 10 total teammates and establishes our 38th office location with their location in Mountain Iron, MN.

FOCUS Engineering was established in 2011 to provide an in-house engineering approach for cities and townships. As an extension of city staff, the team leverages each member's skills, experience, and specialties to meet the needs of the communities they serve. This acquisition brings with it 8 total teammates throughout the Twin Cities metropolitan area.

"These acquisitions are part of our client-focused growth strategy. Benchmark and FOCUS are highly respected firms with whom we've had the great pleasure of partnering with many times in support of serving our collective clients. We feel a close fit from a values and culture perspective and couldn't be more excited to bring our teams together to serve our clients and continue building safe, sustainable, and beautiful communities," said Bolton & Menk's Chief Executive Officer, Bradley DeWolf.

Curious about how we can help you achieve your goals? Dive into our comprehensive services brochure to explore the full range of solutions we offer. Whether you're looking for innovative strategies, expert advice, or tailored support, our ever-growing team is here to help.
