

DGT Associates Acquires Renowned Surveying Firm R.E. Cameron & Associates

January 29, 2025

DGT Associates, one of New England’s leading surveying and engineering firms, today announced the acquisition of Massachusetts-based surveying firm, R.E. Cameron & Associates. This expansion strengthens DGT’s competitive position in the Greater Boston area while broadening its market reach and enhancing its resources. Industry veteran Scott Cameron, PLS, Principal and Chief Surveyor of R.E. Cameron & Associates, will join DGT as a Consultant Surveyor, bringing to the team four decades of exceptional expertise in the field.

Integrating R.E. Cameron & Associates’ 4,000+ survey records into DGT’s already robust archive represents a significant milestone in the firm’s continued expansion. With a legacy rooted in 11 strategic acquisitions and respected predecessors—including New England Survey Service, Inc. (NESS), Schofield Brothers, and Gunther Engineering, Inc.—DGT has built a library unparalleled in the region of more than 20,000 historical records dating back to 1878. This extensive archive enhances the firm’s ability to deliver comprehensive and efficient surveying and engineering services to clients.

“We’re thrilled to welcome Scott to the DGT family and are committed to delivering the same high-quality surveying services his clients have come to trust,” said DGT Co-founder & Principal Michael A. Clifford, PLS. “R.E. Cameron & Associates is distinguished for its accuracy and dedication to the community, with an extensive portfolio that includes work in affordable housing, local educational institutions, and community development. We’re excited to build on that legacy and eager to integrate Scott’s expertise into our team.”

Deeply rooted in the New England surveying network, Cameron has held leadership positions on the Massachusetts Association of Land Surveyors and Civil Engineers (MALSCE) board. He has also been actively involved with the Massachusetts Board of Registration of Professional Engineers and Land Surveyors and The Engineering Center Education Trust (TECET).

“DGT’s technology-first approach and unwavering commitment to accuracy made them an ideal firm to continue serving our clients,” said Cameron. “We admire DGT’s long-standing history and deep ties across the state. We’re confident that DGT will uphold the high standards R.E. Cameron & Associates has established a strong reputation for while also offering enhanced services to meet evolving client needs.”
