

## ERM agrees to acquire Newfields Environmental Division to enhance core environmental services

*January 13, 2025*

ERM, the world's largest specialist sustainability consultancy, has agreed to acquire\* the Environmental Division of NewFields Companies. The acquisition will expand ERM's existing technical and strategic offerings in remediation and environmental services, enhancing its ability to help clients manage liabilities and risks across North America and globally.

The NewFields Environmental Division comprises approximately 110 experts in strategic consultancy, site investigation, and remediation practices. They bring a wealth of experience in areas such as environmental forensics and emerging contaminants, human health impact and risk assessment, data analytics, sediment management and marine sciences, and hydrogeology and groundwater modeling.

Susan Angyal, ERM's Regional CEO for North America, said, "Transforming environmental liabilities and legacy assets is fundamental to the sustainability goals of many organizations. Bringing together the expertise of ERM and NewFields Environmental Division will help clients to tackle an increasingly complex set of environmental challenges while harnessing the growing importance of environmental data for decision-making and value creation."

Patrick Gobb, NewFields CEO, said, "Joining forces with ERM presents an exciting opportunity for our team and clients. We share a commitment to environmental consulting and are eager to leverage our combined strengths to create lasting value for our clients."
