

S. Nelson & Associates Joins SAM

January 08, 2025

SAM, the Managed Geospatial Services™ Company specializing in solutions for utility, transportation, and infrastructure clients, today announced the acquisition of S. Nelson & Associates, Inc., a Georgia-based leader in data collection for electric transmission and distribution line engineering and design surveys. Since 1999, S. Nelson & Associates has demonstrated a commitment to performance and sustainable growth in the region.

The acquisition strengthens SAM's presence in the southeastern United States while enhancing its geomatics, spatial data management, and infrastructure mapping services. This strategic move aligns with SAM's commitment to providing a comprehensive and integrated Managed Geospatial Services™ portfolio for utility clients.

"This acquisition will accelerate our growth in the Southeast and bolster our capabilities in data collection for electric transmission design," said Chris Solomon, CEO of SAM. "It further reinforces our position as a trusted partner for clients seeking end-to-end Managed Geospatial Services™."

Steve Nelson, President of S. Nelson & Associates, expressed enthusiasm for the opportunities the partnership will create. "Joining SAM aligns perfectly with our vision of leveraging cutting-edge data collection to better serve the electric utility market," he said. "Our team will benefit from expanded resources and innovative technologies, enabling us to enhance our services and improve client support."

SAM remains committed to strategic expansion, both organically and through acquisitions, with a focus on advancing technical consulting capabilities, client solutions, and geographic reach. For more information about SAM's M&A strategy, visit the Mergers & Acquisitions section on our website.
