

ZenaTech Acquires KJM Land Surveying LLC, a Second Acquisition to Accelerate Drone Innovation in Land Surveys and Establish a Southeast Base for its Drone as a Service Business

January 23, 2025

ZenaTech, Inc. (Nasdaq: ZENA) (FSE: 49Q) ("ZenaTech"), a technology company specializing in AI (Artificial Intelligence) drone, Drone-as-a-Service (DaaS), enterprise SaaS and Quantum Computing solutions, announces that it has acquired KJM Land Surveying LLC, a well-established Pensacola Florida land survey engineering company with a long history and roster of repeat customers. This is ZenaTech's second acquisition as part of a larger roll-up strategy to disrupt the land survey industry by accelerating the use of drones for speed, accuracy and innovation benefits. The acquisition will also form the base of the Southeast US region of its national Drone as a Service or DaaS business which utilizes drone solutions from its subsidiary company ZenaDrone.

"Closing this second acquisition is another step in our Drone as a Service or DaaS strategy, establishing a Southeast base with an experienced team and customer relationships, which adds to our Northwest base and national rollout. We have the opportunity to significantly disrupt the land survey business at scale using drone technologies. We view our DaaS business model as similar as to how Uber disrupted the taxi industry," said CEO Shaun Passley, Ph.D. "This acquisition, as well as the 20 others we have identified, have the potential to add accretive revenue over the short term as well as the long term."

The US Surveying and Mapping Services industry is estimated at \$10.3 billion according to Business Research Insights, growing at least 3% annually. Remotely piloted drones with an array of sensors and cameras, LiDAR (Light Detection and Ranging), and GPS systems for capturing high-resolution pictures and data are revolutionizing the land survey industry gathering aerial data across expansive terrains in a matter of hours instead of weeks or months using traditional methods.
