

CPH Consulting, LLC Expands Water, Wastewater, and Funding Expertise with Acquisition of Mittauer & Associates, Inc.

March 18, 2025

CPH Consulting, LLC (CPH), a nationally ranked architecture and engineering design firm, has acquired Mittauer & Associates, Inc., a Florida-based engineering firm specializing in water, wastewater, civil, structural engineering, and grant funding. This strategic acquisition strengthens CPH's capabilities in municipal and utility infrastructure while enhancing its ability to assist clients in securing state and federal project funding.

Founded in 1989, Mittauer & Associates, Inc. has established itself as a leader in delivering high-quality, cost-effective engineering solutions for municipalities, utility providers, and counties across Florida. Mittauer & Associates has played a pivotal role in shaping critical infrastructure including water wastewater, roads, stormwater systems, and community redevelopment initiatives.

"Mittauer & Associates joining the CPH family affords us the opportunity to provide innovative, full-service solutions to more communities throughout the state of Florida," said CPH President Peter-John Sutch. "Mittauer & Associates' client-first approach and expertise in grant-funded infrastructure projects will help us better serve our existing clients and expand into new market areas."

For more than three decades, Mittauer & Associates, Inc. has built a reputation for excellence through a holistic, in-house approach to funding and engineering services. The firm's commitment to compliance, technical expertise, and strategic project execution has earned it a trusted position among Florida's municipalities and utility providers.

"This partnership enables us to continue our tradition of building strong and durable relationships, delivering quality solutions while leveraging CPH's wide ranging expertise. Together, we can be of greater value to our clients," said Joseph A. Mittauer, P.E., Founder of Mittauer & Associates. "Funding and deep technical expertise are critical to infrastructure project success, and with CPH, we now have an even stronger platform to support our clients."

By joining forces, CPH and Mittauer & Associates, Inc. will build on their shared values of technical excellence, collaboration, and building stronger more resilient communities. The firms' complementary expertise in engineering and funding strategies will allow clients to streamline project execution from securing financial support to implementing quality solutions. This integration enhances CPH's ability to serve as a full-service partner for municipalities and utilities looking for both design expertise and funding guidance.

By joining forces, CPH's presence in North Florida and expertise in the state's water and wastewater market expands, allowing for better service to municipalities and utilities across the region. At the same time, Mittauer & Associates, Inc. gains access to CPH's multidisciplinary resources and national network, enhancing their ability to take on larger, more complex projects. Together, CPH with Mittauer will help build stronger communities through innovative and sustainable infrastructure solutions.
