

## LRQA strengthens energy transition services with acquisition of EcoEngineers

*March 19, 2025*

LRQA has acquired EcoEngineers, a US-based consulting, auditing and advisory firm with an exclusive focus on the energy transition.

This marks LRQA's fifth acquisition in five months, reinforcing its commitment to accelerating growth and expanding its support for global corporate clients navigating the energy transition.

EcoEngineers was recently recognised globally as a Top 10 Sustainable Consulting Firms by Sustainability Magazine, and offers deep technical expertise in low-carbon production, climate regulations, carbon markets and innovative technologies – areas in high demand amid growing regulatory complexity and uncertainty.

Against this backdrop, businesses still have to respond to pressures from investors, consumers and stakeholders to uphold transparency and integrity in their climate commitments, particularly in the agriculture and energy sectors.

As a result, many are turning to low-carbon fuels such as biofuels, renewable natural gas (RNG) and hydrogen to decarbonize operations. Businesses therefore need specialist guidance on these fuels, the corresponding regulations – such as California's Low Carbon Fuel Standard (LCFS) and the EU's Emissions Trading System (ETS) – and the enabling technologies. This acquisition directly addresses those needs..
